National Security Commission on Emerging Biotechnology

May 30, 2024

Ambassador Lui Tuck Yew
Singapore Ambassador to the United States of America
3501 International Place, NW
Washington DC 20008
United State of America

Dear Ambassador Lui,

We write to offer our congratulations on the occasion of Mr. Lawrence Wong becoming the Prime Minister of Singapore. The United States and Singapore share a warm and deep relationship with strong economic and security ties.

The National Security Commission on Emerging Biotechnology recently conducted an official visit to Singapore. While in Singapore, the delegation met with Singaporean government officials, industry partners, and others to learn about the current landscape of biotechnology and discuss opportunities for greater collaboration. We look forward to continuing this dialogue about our shared priorities, including global biomanufacturing and biotechnology supply chains for economic security and emergency preparedness.

International engagement and collaboration with friends are integral to national security and a thriving biotechnology sector. We hope that the ties between our two countries will only grow stronger as we work to strengthen cooperation between the U.S. and Singapore in the field of emerging biotechnology.

Sincerely,

Dr. Jason Kelly, Chair
